

From Loftus Station:

Leave Loftus Station on the western side. Across to your left is Tenth Avenue. Follow it to the Scout Hall but go straight past it and over the end of the road. Just below the end is a track following a creek downstream in a nearly northern direction, this is the way to go. Keep an eye on the houses to the west as a track will be found to cross this same creek beside the last house.....follow it. Up a grassy hill and on to a fire trail in a westerly direction. The fire trail is at the end of Cranberry Rd., Loftus. Follow this trail until you reach a tee intersection....take the northern trail. A very short distance to a second tee intersection which leads generally west until it swings back to the south and beside Loftus Creek. Look for the concrete crossing and cross the creek to the continuing fire trail now again heading nearly north.

Another short distance to a further fire trail entering on your left. It comes from Kingswood Rd. Engadine.

Not far to go now. Follow the lower fire trail generally north, cross a small creek and it winds its way to Camp Noorumba. You are there when you pass the gate and see the sheds below and to your right.
